

Strong Man Water-Diverting Drainage Tarp

The Strong Man *Water-Diverting Drainage Tarp* is the go-to tarp to effectively divert water away from your work area and is perfect for construction, industrial maintenance, home renovation, roof work, and much more. Easy to install and made from rip-resistant, high-density woven polyethylene, our Drainage Tarp comes with a specially designed fitting that easily connects to any standard 3/4" garden hose.

Water from leaks, melting snow or broken pipes is no match for the Drainage Tarp as it is safely collected and diverted away so repairs may continue! Available in a wide variety of sizes to satisfy all of your job-site needs.

Strong Man Quality. Strong Man Solutions.
