

CUT & SPEC SHEET

POWERBLANKET® HOT BOXES

The Powerblanket® Hot Boxes are pallet warmers made to protect products from cold-or-freezing temperatures during transportation or on a jobsite. Ideal for cold weather storage needs, as well as remote location use, a standard hot box will keep products between 100°F and 120°F.

Choose the Premium Hot Box, with adjustable thermostatic control, to be able to adjust to the ideal temperature, specific to each product. Our energy-efficient Hot Boxes save on operating costs, as well as provide peace of mind that your materials are protected at a consistent temperature. The Hot Boxes use a 120-volt connection and have a durable, vinyl shell to protect materials against the cold without overheating or burning. Available in two performance levels, standard and premium, with wattages ranging from 1200 to 1440 watts.

Product Features:

HotBox:

- ▶ 2 sizes available: Fits 40" x 48" or 36" x 48" pallets
- ▶ 1200 Watt design for faster heating times and more extreme conditions
- ▶ Durable, black vinyl shell
- ▶ Preserves temperature sensitive material
- ▶ Quick and easy assembly for portability and storage
- ▶ Great solution for palletized products: paint, caulk, resins and epoxies, etc.
- ▶ Two side access doors on opposite sides
- ▶ Certified to UL/CSA/CE standards

Premium HotBox:

- ▶ Offers all of the features of Hot Box, plus:
- ▶ Larger footprint (fits 48" x 48" pallet)
- ▶ The highest wattage (1440 Watts)
- ▶ Controller for precise temperature regulation
- ▶ Internal steel frame

Product Benefits:

- ▶ Preserve expensive materials without overheating or burning
- ▶ Quickly and effortlessly install the compact portable design
- ▶ Peace of mind that materials are safely maintained at consistent temperatures
- ▶ Energy efficient design saves on operating costs
- ▶ Flexibility to adjust temperature (available on PRO model only)
