

CUT SHEET

Strong Lock Connector

Securely fasten sheeting panels together with reliable, heavy-duty Strong Lock Connectors. With a simple yet sturdy design, the Strong Lock Connectors twist through layers of sheeting and lock firmly in place. Once locked, these high-strength polyethylene connectors create a tight seal between joined panels, preventing windy conditions from blowing out enclosures. Secure the sheeting once and save time on your jobsite without adjusting and refastening.

Strong Man Products. Strong Man Solutions!
